PROFESSIONAL SUMMARY

Final-year B.Tech student in Artificial Intelligence and Data Science with hands-on experience in Python, Java, SQL, Machine Learning, Deep Learning, Generative AI, Data Analytics, and Backend Development. Experienced in developing AI-powered applications, REST APIs, data analytics dashboards, and research-based solutions using modern AI/ML technologies.

TECHNICAL SKILLS

- Programming & Core CS:** Python, Java, SQL, Data Structures & Algorithms, OOP, DBMS, Operating Systems.
- AI/ML Technologies:** Machine Learning, Deep Learning, CNN, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering
- Frameworks & Tools:** Scikit-learn, TensorFlow, PyTorch, Keras, Hugging Face Transformers, Git, GitHub, Docker, Jupyter Notebook, Google Colab, Figma
- Databases:** PostgreSQL, MongoDB, ChromaDB
- Analytics & Visualization:** Power BI, Microsoft Excel, Tableau

EXPERIENCE

Data Analytics Intern | VDart

JULY 2025 - AUG 2025

- Analyzed large business datasets using Excel and Power BI to deliver actionable insights that supported strategic business decisions.
- Built 5+ interactive Power BI dashboards and KPI reports, improving stakeholder visibility into business performance.
- Cleaned, transformed, and validated **1,000+ records**, improving data accuracy and enabling reliable KPI reporting.
- Collaborated with cross-functional stakeholders to convert business requirements into actionable Power BI dashboards and analytical reports.

PROJECTS

Brain Tumor Classification using Deep Learning | [GitHub](#)

- Developed a deep learning-based medical image classification system using Convolutional Neural Networks (CNNs).
- Trained, validated, and optimized CNN models using MRI datasets to improve classification accuracy and model performance.
- Achieved 96% classification accuracy, improving diagnostic support through automated medical image classification.
- Tech:** Python, PyTorch, CNN, TensorBoard

FloatChat AI – RAG-based Oceanographic Assistant | [GitHub](#)

- Implemented a Retrieval-Augmented Generation (RAG) application using LangChain and ChromaDB to enable natural language querying of oceanographic datasets.
- Integrated Large Language Models (LLMs) with LangChain and ChromaDB to deliver context-aware question answering over domain-specific datasets.
- Implemented semantic search using vector embeddings for improved information retrieval.
- Designed interactive dashboards for visualizing and exploring complex datasets.
- Tech:** Python, Django, LangChain, ChromaDB, PostgreSQL

HealthAgent – AI Healthcare Assistant using LLMs | [GitHub](#)

- Built an AI-powered healthcare assistant using Large Language Models (LLMs), LangChain, and Prompt Engineering.
- Engineered scalable backend APIs using Django and PostgreSQL for secure health data management.
- Designed contextual reasoning workflows to generate personalized health recommendations.
- Implemented Retrieval-Augmented Generation (RAG) for intelligent, context-aware response generation.
- Tech:** Python, Django, LangChain, PostgreSQL

EDUCATION

SARANATHAN COLLEGE OF ENGINEERING

B.Tech in Artificial Intelligence and Data Science

SEP 2023 - JULY 2027

CGPA: 8.29/10

PUBLICATION

MedForecast: A Novel Approach for Web-Based Disease Predictive Healthcare System and Personalized Recommendations

- Published in the book “Advancing Societally Relevant Applications of Knowledge through Scientific Research” (CRC Press, 2026).
- Proposed and built an AI-powered healthcare decision support system integrating machine learning for disease prediction, personalized recommendations, and proactive patient monitoring.
- DOI: [10.1201/9781003770435-2](https://doi.org/10.1201/9781003770435-2)

ACHIEVEMENTS

- NMMS Scholar**, National Means-cum-Merit Scholarship examination.
- Awarded **Second Prize** at the Fourth National Level Research Conclave 2025 hosted by PSG College of Engineering for presenting an AI-driven healthcare research solution.
- Secured **Second Prize** in an Inter-College Decoding Competition, demonstrating strong algorithmic and problem-solving abilities.
- Selected for the college-level round of **Smart India Hackathon (SIH) 2025**, contributing to the development of an AI-powered solution.

CERTIFICATION

- Microsoft Azure AI Essentials Professional Certificate
- Applied Accelerated Artificial Intelligence – NPTEL
- Natural Language Processing for developers - Infosys Springboard
- Power BI – 360DigiTMG
- Java – InLustro
